

LMC Discount Group – TAG Medical Calibration Offer

It's Calibration Season

The Berks, Bucks & Oxon LMCs strive to bring our constituents good discounts on goods relative to services used in general practice.

We have recently negotiated an excellent deal with TAG Medical, a Nottingham based equipment testing and calibration firm.

TAG calculates that practices with 4/5 consulting rooms generally have about 20 pieces of equipment that need calibrating. TAG are offering LMC members a substantial discount on their published price list for 10 items or more. Obviously the more items requiring calibration the greater the discount.

I attach their price list and details of the discounts available.

You can take advantage of this offer by emailing info@tagmedical.co.uk or faxing TAG Medical on 08452 806316

Please remember that only practices that pay both the statutory and voluntary levy are eligible to take advantage of this offer.

Kind regards
